

Current Education and Skills Gap

➤ **Education Gap**

- Gaps at all levels of education including education within the workplace
- Needs to reflect new models of workforce & service delivery
- Education that focuses on the diverse population – cultural competency

➤ **Skills Gap**

- Working in a technology rich environment
- Team based skills recognising the new multi disciplinary focus
 - Capacity to learn and work in context

What will the Landscape Look Like in 20 Years?

- More people receiving care outside traditional health care settings
- Individuals/communities taking greater individual responsibility
- Technology will be a huge influence on where & how health care is provided

What actions should be taken by:

➤ *Industry*

- Foster culturally & linguistically diverse workforces
- Health industry partnering other industries

➤ *Education Providers*

- Development of new curricula to reflect new workforce & service models
 - Strengthen partnerships between health & education at all levels

➤ *Government*

- Social disadvantage
- Focus on cost barriers to training & education
